INTRODUCTION

Currently, I work for the Nashville Software School, coordinating the admissions process and overseeing daily operational needs. I am also a student in the part-time, evening cohort at NSS learning front-end web development (Jan - June 2015) and the Microsoft C# / .NET stack (July - Dec 2015). I am seeking a position as a web developer and believe I would make an excellent addition to a team where more senior developers could mentor and coach. I desire to work for a company whose culture respects their employees' need for work / life balance, where my in-demand skills are fairly compensated, and where investments are made to enhance team members' lives, careers, and future growth.

SKILL PROFILE

Basic front-end: Javascript, HTML, CSS, Jade, Embedded Javascript

Front-end frameworks and libraries: Angular, jQuery, Bootstrap
